# About TEKWALL

---

## **Custom Software Built Around Your Business — Not the Other Way Around.**

We design and develop fully customized business software tailored to your company's real operations, workflows, and departments. Unlike generic CRM or ERP platforms, our solutions are built after understanding how your business actually works — ensuring efficiency, scalability, and complete control.

## **Our Mission**

To empower businesses with technology solutions that are precisely crafted to their unique operational needs, eliminating the constraints of one-size-fits-all software and enabling true digital transformation.

## **Our Vision**

To become the most trusted technology partner for businesses seeking custom software solutions that drive operational excellence, data-driven decision making, and sustainable growth across diverse industries.

## **Company Information**

- **Company Name:** TEKWALL
- **Address:** Plot No. 6-3-164/13/A, Prem Nagar, Banjara Hills, Hyderabad-500034, Telangana
- **Website:** [www.tekwall.com](http://www.tekwall.com)
- **Email:** [info@tekwall.com](mailto:info@tekwall.com)

# Our Services

---

We build powerful, fully customized business systems that help companies manage and automate their entire operations. Every solution is developed from scratch based on your specific requirements.

## Custom ERP Development

End-to-end enterprise resource planning solutions designed specifically for your business processes, integrating all departments into a unified system.

## CRM & Workflow Automation

Customer relationship management systems that align with your sales process, plus intelligent workflow automation to boost productivity.

## Industry-Specific Solutions

Specialized software tailored to the unique requirements of your industry, from compliance to operational workflows.

## Data Analytics & Dashboards

Real-time data visualization and business intelligence dashboards that provide actionable insights for decision-making.

## Software Modernization

Transform legacy systems into modern, scalable applications with the latest technologies and best practices.

## Independent Deployment

Deploy on your own servers with complete ownership and control. No SaaS lock-in, no recurring subscription fees.

# Industries We Serve

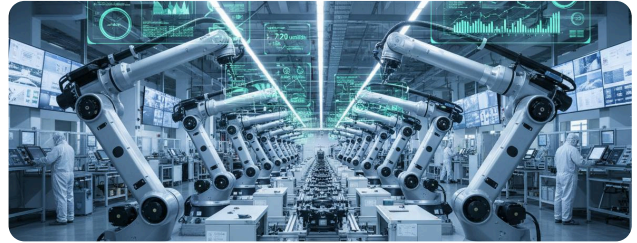

---

We work across multiple industries, building solutions tailored to each business type. Our expertise spans from renewable energy to pharmaceutical compliance systems.

## Solar Energy

RMS, Monitoring Systems, Project Dashboards, and Performance Analytics for solar plant operators.

## Manufacturing

Production Tracking, Inventory Management, Quality Control, and Plant ERP systems.

## Pharmaceutical

Process Management, Compliance Systems, Batch Tracking, and Regulatory Reporting.

## Infrastructure & Construction

Project Management, Resource Planning, Progress Tracking, and Budget Control systems.

*We also serve any business with complex operations that requires custom software solutions.*

# How We Work

---

Our proven methodology ensures successful delivery of your custom software solution. We follow a structured approach that keeps you involved at every stage.

## Understand

We deeply analyze your workflows, departments, and operational challenges.

## Design

We architect a solution tailored specifically to your company.

## Build

Every feature is developed based on your requirements — no templates.

## Deploy

We deploy on independent servers and provide continuous support.

## Our Development Approach

- **Requirement Analysis:** In-depth understanding of your business processes and pain points
- **System Architecture:** Designing scalable and robust technical architecture
- **Agile Development:** Iterative development with regular demos and feedback
- **Quality Assurance:** Rigorous testing at every stage of development
- **Deployment & Training:** Smooth rollout with comprehensive user training
- **Ongoing Support:** Continuous maintenance, updates, and improvements

# Why Choose Us

---

We deliver more than just software — we deliver solutions that transform your business operations and drive measurable results.

## 100% Custom-Built Solutions

Every line of code is written specifically for your business needs. No templates, no generic platforms.

## Designed Around Your Workflow

Software that adapts to how you work, not the other way around. Seamless integration with your processes.

## Scalable for Any Industry

Our solutions grow with your business. From startups to enterprises, we build for scale.

## Full Ownership & Control

You own the code, the data, and the deployment. No vendor lock-in, complete independence.

## Direct Developer Interaction

Work directly with our developers. No middlemen, no communication gaps, just clear collaboration.

## No Generic Software or Templates

Every solution is crafted from scratch based on your specific requirements and business logic.

# Our Work

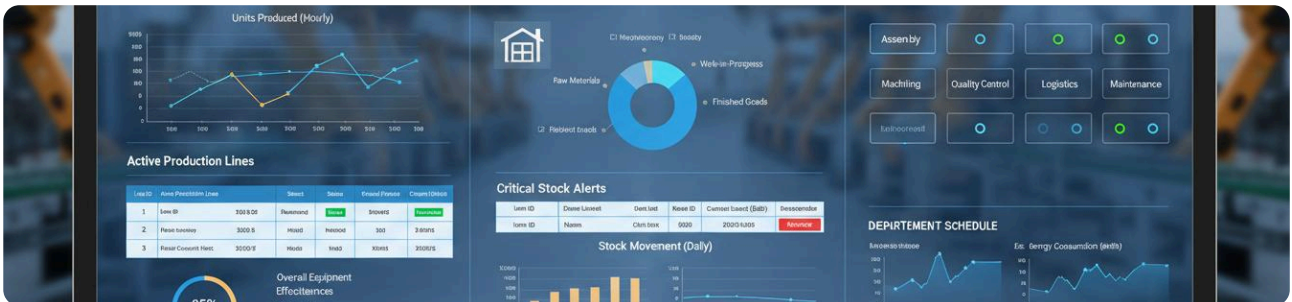

Explore some of our successful custom software implementations that have transformed businesses across industries.

## SOLAR ENERGY

### Solar RMS System

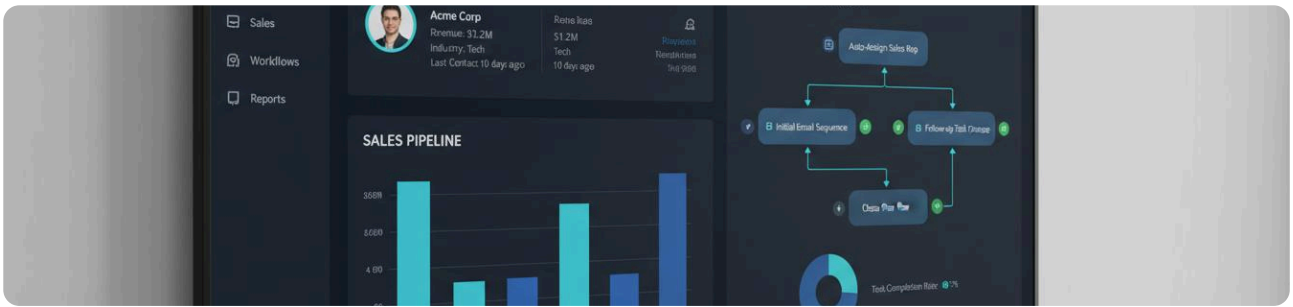

Real-time plant monitoring, fault detection, and centralized dashboards for a 500MW solar installation. Features include performance analytics, automated alerts, and maintenance scheduling. This system has helped reduce downtime by 35% and improved overall plant efficiency.

## MANUFACTURING

### Manufacturing ERP

Complete ERP system with production tracking, inventory management, and department-level controls. Integrated with IoT sensors for real-time production monitoring. The system streamlined operations across 5 departments and reduced manual data entry by 80%.

## CRM

### Custom CRM System

Fully aligned with client-specific sales and operations workflow. Features include lead management, automated follow-ups, sales forecasting, and comprehensive reporting. Increased sales team productivity by 45% and improved lead conversion rates.
